

FACE Study

Understanding facial emotions and expressions

What is this research study?

This study is an exciting new study that aims to understand how people recognise facial emotions. It is important to know how people process facial emotions so that we can learn how to help people who have difficulties in recognising faces.

What do you have to do?

If you decide to take part, you will be asked to fill out an online survey. The survey includes three short fun tasks that involve looking at faces. It should take no longer than 20 minutes to complete.

Criteria for taking part?

- Age 16+
- No visual impairment
- Have a diagnosis of Turner Syndrome

If you are interested in taking part please use the following links:
